

COSHH Assessment Form

_		harm to health from the substar om other hazards associated with this					
Assessor (print) (1)		Employer/Supervisor (2)					
Graham Barker		Mobitech Lift Trucks					
Assessment Date (3)		Dates reviewed ⁽⁴⁾					
07/04/2020							
HAZARDS IDENTIFIED							
		a H350 or H350i hazard statement, it lealth) where exposure is not adequate	_				
Substance ⁽⁵⁾	Haz	zardous Properties ⁽⁶⁾	Quantity ⁽⁷⁾				
	cou inha	rovide details of how the substance uld cause harm, e.g. harmful by alation, skin contact, flammable, rcinogen, allergen, etc)	(Indicate how much of the substance will be used)				
Comma X stream Rad Seal	Hov the	ot classified for health hazards. wever, occupational exposure to mixture or substance(s) may use adverse health effects.	As Per service and maintenance requirements				
Additional information ⁽⁸⁾ • Workplace Exposure Lim	its:						
UK. EH40 Workplace Exposure Lin Components Ty Glycerol (CAS 56-81-5) TV	nits (WELs) pe VA 'EL	Value 10 mg/m3 1250 mg/m3 500 ppm 999 mg/m3 400 ppm	Form Mist.				
S-phrases: NOT CLASSIF	IED						

H and P statements: NOT CLASSIFIED

Emergency Procedures⁽⁹⁾

• Eye contact:

Rinse with water. Get medical attention if irritation develops and persists.

Skin Contact:

Wash off with soap and water. Get medical attention if irritation develops and persists

Inhalation:

Move to fresh air. Call a physician if symptoms develop or persist.

Ingestion:

Rinse mouth. Get medical attention if symptoms occur.

Spill procedure:

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

What will the chemical be used for?

Vehicle cooling system sealer

Who may be exposed? (10)

Service Engineers / Stores Persons

METHODS OF PREVENTION OR CONTROL OF EXPOSURE

(select all that apply by circling/ticking/highlighting the appropriate statement)

1. Engineering controls required(11)	2. Access control ⁽¹²⁾					
 total containment fume cupboard local exhaust ventilation blast screen 	 Restricted to competent personnel Special containment facility (give specific area): workshop environment only. 					
3. Special procedures ⁽¹³⁾	4. Approved PPE(14) (Note: PPE is to be used as the 'last					
0: 1 10 :: 5 1 (005)	resort' when controlling exposure)					
Standard Operating Procedure (SOP) required						
Code of practice, local rules, etc	gloves etc (specify type) latex					
	 eye protection (specify type) Type B safe Glasses 					
	 laboratory coat/overalls (specify type) company supplied 					

Disposal Procedures⁽¹⁵⁾ (Give details of waste disposal procedure to be used)

Are chemicals with risk phrases R50-R59 or hazard statements H400 – H413 (environmental Hazards) involved?

Yes / No

GENERAL INFORMATION:

Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner

DISPOSAL METHODS:

Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

ENVIRONMENTAL PRECAUTIONS:

Avoid discharge into drains, water courses or onto the ground.

TRAINING REQUIREMENTS(16)

(List any specialised training requirements before work can begin)

As per engineer training and directions on product

HANDLING AND STORAGE REQUIREMENTS(17)

(Note any special requirements e.g. ventilation, chemical incompatibility, flash point, etc)

USAGE PRECAUTIONS:

Avoid prolonged exposure. Observe good industrial. Precautions for safe hygiene practices.

STORAGE PRECAUTIONS:

Store in original tightly closed container.

ASSESSMENT OF RISK USING CONTROLS DETAILED ABOVE(18)

(Are the hazards/risks suitably controlled, using the control measures detailed above? If not, state the further actions required, e.g. Requirement for a standard operating procedure (SOP), etc).

YES

<u>Authorisation</u>	by	Emp	loyer	/Super	visor	19

I confirm	that	I hav	e cor	sidered	and u	nderst	and the c	hemi	cal to	be i	used an	d the a	SSOC	iated	hazards. I	am
satisfied	that	all o	f the	hazards	have	been	identified	and	that	the	control	meası	ures 1	to be	followed	will
reduce th	e risl	ks to	as lo	w a level	as rea	sonal	oly praction	cable.								

reduce the risks to as low a level as reasonably practicable.
Sign: GRAHAM BARKER
Date:07.04.2020

Declaration by Employer/Supervisor (20)

I confirm that I have read this COSHH Assessment and that I understand the hazards and risks involved and will follow all of the safety procedures stated.

Declaration by employee²⁰

I confirm that the employee who has signed below is competent to undertake the work. My counter-signature indicates that I am happy for the work to proceed.

Name (please print)	Signed	PI countersignature	date

Guidance notes for COSHH assessment form

This form must be completed for every hazardous chemical used within the company. The form must be signed by the employee and their employer/supervisor before the work starts.

- (1) **Assessor:** Insert the name of the person doing this assessment
- (2) Employer/Supervisor Insert the name of the Employer/Supervisor.
- (3) **Assessment Date:** Insert the date that the assessment form is completed. The assessment is valid for a maximum of 1 year. It must be reviewed after 1 year, or if a significant change occurs (change of lab, pregnancy, etc).
- (4) **Dates reviewed:** all COSHH assessments must be reviewed annually (as a minimum). The review date should be entered here, and signed by the assessor to confirm that the assessment is still valid.
- (5) **Substance:** insert name of the chemical to be used. NB. Biological hazards must not be assessed on this COSHH form.
- (6) **Hazardous properties**: insert details of all of the hazardous properties of the chemical eg. Flammable, explosive, carcinogen, harmful by inhalation, etc).
- (7) **Quantity**: insert quantity to be used (mg, g, ml, etc)
- (8) **Additional information**: Include details of any additional information, including any workplace exposure limits. Detail fully all R/S phrases and H and P statements (it is not sufficient to simply stat R45, full details are needed).
- (9) Emergency procedures: provide full details of emergency procedures to be employed following contact with the chemical (skin contact, eye contact, inhalation and ingestion) such as use of diphoterine, administration of emergency oxygen, etc. Also include details of emergency spill procedures.
- (10) What will the chemical be used for? Who may be exposed? : Insert title of experiment or experimental procedure that the chemical is to be used in, and detail who may be exposed (individual worker? People in close proximity? Cleaners? Engineers?).

Methods of prevention or control of exposure

Sections 11-14 detail the methods for preventing or controlling exposure to the chemical. The COSHH hierarchy of control measures should be used when determining the methods to be used to prevent/control exposure, with engineering and group control measures being employed in preference to individual measures (such as individual PPE).

- (11) **Engineering controls** required: identify the control measures necessary to prevent/control exposure, such as use of a fume cupboard, LEV or blast screen, by circling/ticking/highlighting the appropriate statement(s).
- (12) **Access control**: In order to prevent/control exposure, is it necessary to restrict access to competent personnel? Are special containment facilities required? Please circle/tick/highlight the appropriate statement(s).
- (13) **Special procedures**: please identify any special procedures necessary to prevent/control exposure. This might include the need for an SOP to be developed, or for local rules to be drawn up. Please circle/tick/highlight the appropriate statement(s).
- (14) **Approved PPE**: PPE is to be used as the 'last resort' when preventing/ controlling exposure. Please detail the PPE to be used when handling the chemical. Please circle/tick/highlight the appropriate statement(s) and include details of the type of gloves, etc to be used.
- (15) **Disposal procedures**: Identify whether the chemical is an environmental hazard; Detail fully how the chemical waste is to be disposed of (down sink, by specialist contractor, etc)
- (16) **Training requirements**: detail any specialised training requirements that must be met before the work can begin eq. Attendance on a gas safety course, etc).
- (17) **Handling and storage requirements**: Note any special requirements e.g. ventilation, chemical incompatibility, flash point, etc.
- (18) Assessment of risk using controls detailed above: Are the hazards/risks suitably controlled, using the control measures detailed above? Provide details; If not controlled, state the further actions required, eg. Requirement for a standard operating procedure (SOP), etc.
- (19) **Authorisation by Employer/Supervisor:** the employer/supervisor must sign and date the assessment, to confirm that they have considered and understand the chemical to be used and the associated hazards, and that they are satisfied that all of the hazards have been identified and that the control measures to be followed will reduce the risks to as low a level as reasonably practicable.
- (20) **Declaration by employee:** the employee must sign and date the assessment to confirm that they have read the COSHH Assessment, understand the hazards and risks involved and will follow all of the safety procedures stated.
- (21) **Declaration by Employer/Supervisor** the employer/supervisor must sign and date the assessment, to confirm that the researcher is competent to undertake the work.
