

COSHH Assessment Form

This assessment **only addresses the risk of harm to health** from the substances listed. Additional risk assessments may be required to control the risk from other hazards associated with this work/the procedures used.

Assessor (print) ⁽¹⁾ Graham Barker	Employer/Supervisor ⁽²⁾ Mobitech Lift Trucks
---	---

Assessment Date ⁽³⁾ 06/04/2020	Dates reviewed ⁽⁴⁾
---	--------------------------------------

HAZARDS IDENTIFIED

*If the substance has a R45 or R49 risk phrase or a H350 or H350i hazard statement, it must also be registered on your personal carcinogen return (at Occupational Health) *where exposure is not adequately controlled.*

Substance ⁽⁵⁾	Hazardous Properties ⁽⁶⁾	Quantity ⁽⁷⁾
	<i>(Provide details of how the substance could cause harm, e.g. harmful by inhalation, skin contact, flammable, carcinogen, allergen, etc)</i>	<i>(Indicate how much of the substance will be used)</i>
Product name Triad 32 Hydraulic Oil Product number 7589	Inhalation, Ingestion, Skin contact, Eye contact, Avoid heat, flames and other sources of ignition	As Per service and maintenance requirements

Additional information ⁽⁸⁾

- Workplace Exposure Limits:
 Distillates,hydrotreated heavy paraffinic
 Long-term exposure limit (8-hour TWA): ACGIH 5 mg/m³
 Short-term exposure limit (15-minute): ACGIH 10 mg/m³

- Distillates,hydrotreated heavy paraffinic
 Long-term exposure limit (8-hour TWA): ACGIH 5
 Short-term exposure limit (15-minute): ACGIH 10 mg/m³

- Mineral Oil
 Long-term exposure limit (8-hour TWA): OES 5 mg/m³(c)

- R-phrases:
 R41 Risk of serious damage to eyes
 R51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

- S-phrases: Not Classified

- H and P statements:
H304 May be fatal if swallowed and enters airways.
H318 Causes serious eye damage.
H411 Toxic to aquatic life with long lasting effects.

Emergency Procedures⁽⁹⁾

- Eye contact
Rinse immediately with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. Continue to rinse for at least 15 minutes. Get medical attention promptly if symptoms occur after washing.
- Skin Contact
Remove contaminated clothing immediately and wash skin with soap and water.
- Inhalation:
If spray/mist has been inhaled, proceed as follows. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Get medical attention if any discomfort continues.
- Ingestion:
Get medical attention if any discomfort continues. Do not induce vomiting.
- Spill procedure:
In case of spillage on water prevent the spread by use of suitable barrier equipment. Contain and absorb spillage with sand, earth or other non-combustible material. Collect and place in suitable waste disposal containers and seal securely. Residues and empty containers should be taken care of as hazardous waste according to local and national provisions.

What will the chemical be used for?

Universal hydraulic oil.

Who may be exposed?⁽¹⁰⁾

Service Engineers / Stores Persons

METHODS OF PREVENTION OR CONTROL OF EXPOSURE

(select all that apply by circling/ticking/highlighting the appropriate statement)

<p>1. Engineering controls required⁽¹¹⁾</p> <ul style="list-style-type: none"> total containment fume cupboard local exhaust ventilation blast screen 	<p>2. Access control⁽¹²⁾</p> <ul style="list-style-type: none"> Restricted to competent personnel Special containment facility (give specific area): workshop environment only.
<p>3. Special procedures⁽¹³⁾</p> <ul style="list-style-type: none"> Standard Operating Procedure (SOP) required <input type="checkbox"/> Code of practice, local rules, etc 	<p>4. Approved PPE⁽¹⁴⁾ (Note: PPE is to be used as the 'last resort' when controlling exposure)</p> <ul style="list-style-type: none"> gloves etc (specify type) latex eye protection (specify type) Type B safe Glasses laboratory coat/overalls (specify type) company supplied
<p>Disposal Procedures⁽¹⁵⁾ (Give details of waste disposal procedure to be used)</p> <p>Are chemicals with risk phrases R50-R59 or hazard statements H400 – H413 (environmental Hazards) involved? Yes / No</p> <p>GENERAL INFORMATION: This material and its container must be disposed of as hazardous waste. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.</p> <p>DISPOSAL METHODS: Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Dispose of waste via a licensed waste disposal contractor.</p> <p>ENVIRONMENTAL PRECAUTIONS: Do not allow the product to contaminate land or water. The product is insoluble in water and will spread on the water surface. Avoid the spillage or runoff entering drains, sewers or watercourses. Contain spillage with sand, earth or other suitable non-combustible material.</p>	
<p>TRAINING REQUIREMENTS⁽¹⁶⁾</p> <p>(List any specialised training requirements before work can begin)</p> <p>As per engineer training and directions on product</p>	

HANDLING AND STORAGE REQUIREMENTS⁽¹⁷⁾

(Note any special requirements e.g. ventilation, chemical incompatibility, flash point, etc)

USAGE PRECAUTIONS:

Avoid spilling. Always remove oil with soap and water or skin cleaning agent, never use organic solvents. Do not use oil-contaminated clothing or shoes, and do not put rags moistened with oil into pockets

STORAGE PRECAUTIONS: Store in tightly-closed, original container in a dry, cool and well-ventilated place.

STORAGE CLASS: Miscellaneous hazardous material storage.

ASSESSMENT OF RISK USING CONTROLS DETAILED ABOVE⁽¹⁸⁾

(Are the hazards/risks suitably controlled, using the control measures detailed above? If not, state the further actions required, e.g. Requirement for a standard operating procedure (SOP), etc).

YES

Authorisation by Employer/Supervisor¹⁹

I confirm that I have considered and understand the chemical to be used and the associated hazards. I am satisfied that all of the hazards have been identified and that the control measures to be followed will reduce the risks to as low a level as reasonably practicable.

Sign: GRAHAM BARKER

Date:06.04.2020

Declaration by Employer/Supervisor⁽²⁰⁾

I confirm that I have read this COSHH Assessment and that I understand the hazards and risks involved and will follow all of the safety procedures stated.

Declaration by employee²⁰

I confirm that the employee who has signed below is competent to undertake the work. My counter-signature indicates that I am happy for the work to proceed.

Name (please print)	Signed	PI countersignature	date

Guidance notes for COSHH assessment form

This form must be completed for every hazardous chemical used within the company. The form must be signed by the employee and their employer/supervisor before the work starts.

- (1) **Assessor:** Insert the name of the person doing this assessment
- (2) **Employer/Supervisor** Insert the name of **the Employer/Supervisor**.
- (3) **Assessment Date:** Insert the date that the assessment form is completed. The assessment is valid for a maximum of 1 year. It must be reviewed after 1 year, or if a significant change occurs (change of lab, pregnancy, etc).
- (4) **Dates reviewed:** all COSHH assessments must be reviewed annually (as a minimum). The review date should be entered here, and signed by the assessor to confirm that the assessment is still valid.
- (5) **Substance:** insert name of the chemical to be used. NB. Biological hazards must not be assessed on this COSHH form.
- (6) **Hazardous properties:** insert details of all of the hazardous properties of the chemical – eg. Flammable, explosive, carcinogen, harmful by inhalation, etc).
- (7) **Quantity:** insert quantity to be used (mg, g, ml, etc)
- (8) **Additional information:** Include details of any additional information, including any workplace exposure limits. Detail fully all R/S phrases and H and P statements (it is not sufficient to simply stat R45, full details are needed).
- (9) **Emergency procedures:** provide full details of emergency procedures to be employed following contact with the chemical (skin contact, eye contact, inhalation and ingestion) – such as use of diphoterine, administration of emergency oxygen, etc. Also include details of emergency spill procedures.
- (10) **What will the chemical be used for? Who may be exposed? :** Insert title of experiment or experimental procedure that the chemical is to be used in, and detail who may be exposed (individual worker? People in close proximity? Cleaners? Engineers?).

Methods of prevention or control of exposure

Sections 11-14 detail the methods for preventing or controlling exposure to the chemical. The COSHH hierarchy of control measures should be used when determining the methods to be used to prevent/control exposure, with engineering and group control measures being employed in preference to individual measures (such as individual PPE).

- (11) **Engineering controls** required: identify the control measures necessary to prevent/control exposure, such as use of a fume cupboard, LEV or blast screen, by circling/ticking/highlighting the appropriate statement(s).
- (12) **Access control:** In order to prevent/control exposure, is it necessary to restrict access to competent personnel? Are special containment facilities required? Please circle/tick/highlight the appropriate statement(s).
- (13) **Special procedures:** please identify any special procedures necessary to prevent/control exposure. This might include the need for an SOP to be developed, or for local rules to be drawn up. Please circle/tick/highlight the appropriate statement(s).
- (14) **Approved PPE:** PPE is to be used as the 'last resort' when preventing/ controlling exposure. Please detail the PPE to be used when handling the chemical. Please circle/tick/highlight the appropriate statement(s) and include details of the type of gloves, etc to be used.
- (15) **Disposal procedures:** Identify whether the chemical is an environmental hazard; Detail fully how the chemical waste is to be disposed of (down sink, by specialist contractor, etc)
- (16) **Training requirements:** detail any specialised training requirements that must be met before the work can begin – eg. Attendance on a gas safety course, etc).
- (17) **Handling and storage requirements:** Note any special requirements e.g. ventilation, chemical incompatibility, flash point, etc.
- (18) **Assessment of risk using controls detailed above:** Are the hazards/risks suitably controlled, using the control measures detailed above? Provide details; If not controlled, state the further actions required, eg. Requirement for a standard operating procedure (SOP), etc.
- (19) **Authorisation by Employer/Supervisor:** the employer/supervisor must sign and date the assessment, to confirm that they have considered and understand the chemical to be used and the associated hazards, and that they are satisfied that all of the hazards have been identified and that the control measures to be followed will reduce the risks to as low a level as reasonably practicable.

- (20) **Declaration by employee:** the employee must sign and date the assessment to confirm that they have read the COSHH Assessment, understand the hazards and risks involved and will follow all of the safety procedures stated.
- (21) **Declaration by Employer/Supervisor:** the employer/supervisor must sign and date the assessment, to confirm that the researcher is competent to undertake the work.
